

# SUMP PUMP PANEL

## Monitoring and Control

### SOLUTION

- ▶ Non-contact radar measures sump level
- ▶ High-level point detection to protect from overflow.
- ▶ Local visual and audible annunciation.
- ▶ Level and pump utilization historization.
- ▶ Ability to customize based on your specific requirements.

### ADVANCED TECHNOLOGY

- ▶ Accurate and Dependable Level Monitoring.
- ▶ Enhances Pump Protection/Performance.
- ▶ Automated Control eliminates the need for manually enabling the sump pumps.
- ▶ Supports compliant data recording.
- ▶ Wired or wireless communication with local Plant DCS/PLC.

## ABOUT TAS

### ▶ Full-Service Automation Provider

- ▶ PLC
- ▶ SCADA
- ▶ Control/VFD Panels
- ▶ Sample Systems
- ▶ Wired/Wireless Networking

- ▶ Certified Premier Systems Integrator
- ▶ Design, Program, Build, and Commission
- ▶ Local In-Field Automation Specialists
